EGit and JGit 3.3
Release Review

Shawn Pearce (sop@google.com)
Matthias Sohn (matthias.sohn@sap.com)
About

EGit is an Eclipse Team provider for Git. Git is a distributed SCM, which means every developer has a full copy of all history of every revision of the code, making queries against the history very fast and versatile. The EGit project is implementing Eclipse tooling for the JGit Java implementation of Git.

JGit is an EDL (BSD) licensed, lightweight, pure Java library implementing Git.
Introduction

EGit and JGit are Technology sub projects.

- [http://eclipse.org/egit](http://eclipse.org/egit)
- [http://eclipse.org/jgit](http://eclipse.org/jgit)

This release is the 18th release for both projects at Eclipse.org, and the goal is to foster the Eclipse community around Git.
Committer Diversity

There are many individuals and companies involved with EGit (20 committers) and JGit (13 committers)

Ageto, CollabNet, Dewire, GitHub, Google, IBM, Obeo, Twitter, SAP, Tasktop
JGit Features

Features

- Add symlink support to JGit (Java 7 only, including newer Windows versions)
- Abstraction for HTTP connections and alternate implementation using Apache HttpClient
- Use branch.<x>.mergeoptions and merge.ff as defaults for merging
- Support fetch.prune and remote.<name>.prune to set prune mode when fetching
- Add git checkout --orphan implementation
- Support the GIT_CONFIG_NOSYSTEM environment variable
- Include entries for directories for archive command
- Prepend a specified prefix to all entry filenames for archive command

Many bug fixes

Complete list of improvements in New and Noteworthy
EGit Features

Features
- Add ability to squash commits directly from the history view
- Add a config option for the default source ref when branching
- UI support for pruned references in fetch results
- Allow to create configuration entries containing dots

Usability Improvements
- Option to shorten long ref names at start in history view
- Allow force push in Push Branch wizard, pre-select existing upstream configuration
- Prompt if there are unsaved files on stash
- Strip "git clone" from pasted clone command
- Show author and committer info for commits in Interactive Rebase view
- Make clean command available on projects under Team > Advanced
- In 'Search Git Repositories' wizard resolve variables in repository path

Performance Improvements
- Improve performance of staging view with a large set of dirty files
- Fixed refresh loop in history view

Many bug fixes

Find complete list of improvements in New and Noteworthy
GitHub Connector

- Fix duplicate URL encoding of repository search query
Non Code Aspects

User Guide and extensive Contributor Guide

Lively discussion on mailing lists and EGit forum show a growing community:
